Flow

%, \$ and party # is autopopulated with default

press of ✓ moves user through spaces \$ first then % and finally split #

user can press ✓ and not select a number = 0

party # max = 9
% # max = 50
\$ max = 999.99

as the user changes the numbers on each ✓ press the total should calculate.

ex: if it is currently at 15% and the user changes the 1 to a 3 and presses ✓, the total \$ would change.
